

**AMERICAN COLLEGE OF VETERINARY PATHOLOGISTS
CLINICAL PATHOLOGY – 2009**

CYTOLOGY/SURGICAL PATHOLOGY

Projected Images Exam

1. Place your candidate number on this and each of the following pages.
2. This examination consists of 36 questions to be answered while viewing projected images.
 - Approximately 1.5 - 2 minutes will be provided per item to view the images and write the answer. The images will not be projected a second time.
 - Write your answers in the spaces provided for each question listed on the following pages. Be as specific as possible when writing your answers.
3. All cytology images are stained with Wright's or Wright-Giemsa, and all histology images are stained with hematoxylin and eosin (H&E) unless otherwise indicated.
4. The types of questions most frequently asked involve one of the following:
 - a. Identification of an indicated structure.
 - b. Provide a diagnosis or interpretation based on the abnormality or abnormalities present in the image.
5. Do not write in the right hand margin or at the bottom of the page.
6. The point breakdown for the Cytology/Surgical Pathology Section is: Multiple Choice 25%, Microscopic 50%, and Projected Images 25%.
