AMERICAN COLLEGE OF VETERINARY PATHOLOGISTS  
CLINICAL PATHOLOGY - 2009

HEMATOLOGY

Glass Slide Examination

1. Place your candidate number and slide set number on each page of this examination.
2. This examination consists of 10 glass slide cases. Each flat of slides will be shared by two candidates. The number of each case corresponds to the number on each glass slide. Each case is identified on the subsequent pages. All slides are stained with either Wright's or Wright-Giemsa unless otherwise indicated.
3. For each case, compose a written answer of the following general format:
  - a. *Morphologic Description*: This must provide the reader with a clear, concise description of pertinent qualitative and quantitative findings.
  - b. *Interpretation*: As specifically as possible, provide any of the following that appear applicable to each case:
    - Diagnosis of disease or process
    - Differential diagnosis
    - Potential etiologies
    - Additional tests you would recommend
4. Limit answers to the spaces provided on the front sides of the following pages.
5. Do not write in the right margin or at the bottom of the page.
6. Questions average 20 points each.
7. The point breakdown for the Hematology Section is: Multiple Choice 40%, Microscopic 40%, and Projected Images 20%.
